Cambridge IGCSE Statistics Coursebook

Cambridge University Press

9781009532402

Dean Chalmers

This coursebook will help your students build a confident working knowledge of concepts in probability and statistics. Students will develop their data literacy skills by using statistics in real-world contexts and analysing the results of statistical techniques. A wide range of activities provide opportunities to practise applying key statistical methods and measures, such as sampling, linear interpolation and standard deviation. Help your students prepare for further study by providing opportunities to display their practical skills, such as selecting an appropriate statistics technique for a given scenario. Suitable to support the Cambridge IGCSE (TM) Statistics syllabus (0479) for examination from 2027.

Cambridge Business

Cambridge IGCSE and O Level Business Coursebook

Cambridge University Press

9781009813501

Houghton, Burslem-Curl, Jain, Fisher

This coursebook helps students build an understanding of key business concepts, with engaging visual tools and real-life examples to ensure topics are accessible for all students. Engage your students with a variety of activities to encourage active learning, from calculating the labour productivity of a manufacturing business to debating whether globalisation is beneficial to the economy. Case studies with questions encourage students to explore roles and operations within real businesses, such as Yao Secret and Hasbro. Access short videos and key term definitions in the digital coursebook, to provide additional support for students with English as an additional language.

Cambridge IGCSE and O Level Environmental Management Coursebook

Cambridge University Press

9781009809009

Skinner, Crafer, Turner, Skinner, Stacey

This print and digital coursebook contains a wide variety of activities, case studies and formative assessment opportunities. Support your learners as they develop both a broad and localised knowledge of environmental issues from plastic pollution to fracking, and to employ scientific methods to evaluate management strategies such as national parks and reserves, seed banks and ecotourism. Learners will also discover the significance of climate change and develop their field work skills, helping them to hypothesise, record and analyse data, and form conclusions based on their findings. They will learn how to follow sustainable practice and take care of habitats and organisms during practical investigations. This coursebook is suitable for supporting learners through the Cambridge IGCSE™ and O Level Environmental Management syllabuses (0680/5014) for examination from 2027. Answers are available to teachers and learners via Cambridge GO.
